Interview addendum for Application Serial No. 09/255,737

Regarding the pending claims and the Office Action dated June 19th, 2009, Applicant wishes to discuss the following proposed amendment and passages from the combination:

- (1) Discuss the finality of the rejection in light of the following:
- a. The finality of the rejection is improper because this is the first time official notice has been cited during prosecution;
 - b. The finality of the rejection is also improper because the preceding action was an election of species;
 - c. The rejection did not evidence that amendments by Applicant necessitated the new art. Applicant has not had an opportunity to challenge the implication of official notice; and
 - d. official notice is improper in light of the restriction requirement between groups I and II (Restriction Requirement page 2 bottom of page).
- (2) The pending obviousness rejection and the implication of official notice is improper in light of the restriction requirement between groups I and II (Restriction Requirement page 2 bottom of page); and
- (3) The combination of Hazy/official notice are at odds because Hazy teaches away from criterion that is "specified by a person other than the user."

Discuss the following proposed amendment (not for entry on the record).

1. (currently amended) A computer-implemented method of providing investment information to a user of a first computer, comprising the steps of:

(1) receiving in a second computer a plurality of data feeds of data each including information concerning a plurality of one or more investments;

(2) parsing each of the plurality of data feeds of data to extract at least one quantitative data item for each of the plurality of one or more investments;

(3) comparing each extracted quantitative data item that was extracted to one or more of a plurality of triggers specified by a user, each trigger comprising an association between a predefined criterion of interest, specified by a person an entity other than the user of the first computer, and one or more of the extracted quantitative data items that were extracted and, if when the comparison indicates a match, setting forwarding to a computer associated with the user, of an corresponding alert for that the trigger that corresponds to the criterion that matches; and

(4) causing the computer associated with the user to display the alert for the trigger specified by the user displaying on a screen associated with the first computer one or more alerts that have been set for an investment selected by the user of the first computer;

wherein at least some of the alerts belong to a category reserved for most timely and relevant alerts, the at least some of the alerts being displayed in a manner indicating their membership in the category.

Applicant appreciates Examiner's willingness to work with Applicant in advancing the prosecution of the subject application in the most expeditious manner possible.
